Einführung in die Kodierung mittelhochdeutscher Texte

Linguistische Annotation

Linguistische Einheiten

- <u>s</u> (s-unit) contains a sentence-like division of a text.
- <u>cl</u> (clause) represents a grammatical clause.
- **phr** (phrase) represents a grammatical phrase.
- <u>w</u> (word) represents a grammatical (not necessarily orthographic) word.

Attributen für linguistische Annotation

Beim <w> und <pc>

- @lemma provides a lemma (base form) for the word.
- @lemmaRef provides a pointer to a definition of the lemma for the word, for example in an online lexicon.
- @pos(part of speech) indicates the part of speech assigned to a token (i.e. information on whether it is a noun, adjective, or verb), usually according to some official reference vocabulary (e.g. for German: STTS, for English: CLAWS, for Polish: NKJP, etc.).
- @msd (morphosyntactic description)
- **@join** when present, it provides information on whether the token in question is adjacent to another, and if so, on which side.
